SECURITY, LLC

# Maritime SECURITY

“Security is often viewed as an expense necessary to mitigate the consequences of an incident, rather than as an investment to ensure the integrity of business operations through the supply chain”

Ronald Thomason  
Vice President of strategic programs for the Maritime Security Council (MSC)

PH: (757) 554-0699  
FX: (208) 693-9692

1569 Diamond Springs Rd  
Virginia Beach, VA 23455

# Helping to ensure Piracy doesn't pay

## MARITIME PIRACY

inflates insurance costs, provides pirate gangs tens of millions of dollars in ransoms and endangers more lives now than ever before. STS has developed the most comprehensive maritime security capabilities packages available today.

STS provides in-depth intelligence products to the customers focusing on operational capabilities, intent and activity of the various hostile groups in specific geographical areas.

Our intelligence products assist customers in designing security postures to deter attack. STS can also provide in-depth port assessments identifying potential problem areas once a vessel is pier side (potential avenues of approach, attack methods, and hostile surveillance locations).

The combination of a relevant threat analysis with an unbiased port assessment, is the most effective formula for Vessel Security Plan development.

STS contacts within host nation Law Enforcement Agencies in addition to strong State Department ties, provide for smooth and efficient vessel transits saving companies valuable time and money.

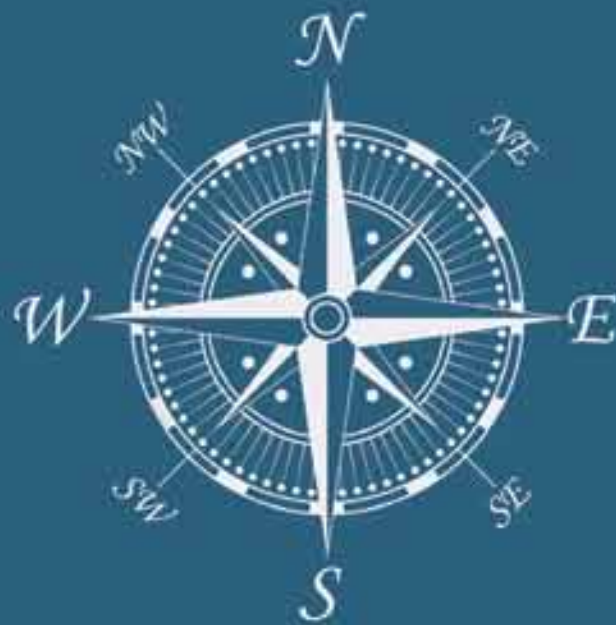

# MARITIME Services

The Maritime Division of STS Security provides proven products and services for commercial ports and vessels to both private and military entities. STS provides security specialists, equipment, and services around the globe. Services and Equipment available from STS include:

- Armed vessel security
- Port, vessel, and facility security assessments
- Security exercises
- Offshore facility security
- Non-lethal security equipment
- Maritime Security Training
- Maritime Operational Intelligence
- Ballistic Weapons Stand (BWS) manufacture, sales, and installation

# Area of OPERATIONS

STS SECURITY is capable of operating in any sector around the globe, and currently provides security elements throughout the Mediterranean Sea, Red Sea, Gulf of Aden, Persian Gulf and the Indian Ocean.

We have developed an extensive network of contacts in the private sector as well as with several government entities to facilitate the movement of personnel and equipment through a variety of countries in those regions.

# SECURITY Specialists

All of our SECURITY SPECIALISTS are selected from the best of our nation's military, US Coast Guard (USCG) and law enforcement professionals. They each bring years of real world experience in protective operations and anti-terrorism/force protection missions. All of our professionals meet USCG MARSEC Directives and CFR requirements for security personnel. This stringent selection process reflects the high demands and expectations of STS Security Management.

STS Security Personnel are highly qualified, professional and discreet. Each member is stringently vetted and possesses Transportation Worker Identification Credentials (TWIC). All personnel are in compliance with or have successfully completed the following:

- Psychological Assessment (Minnesota Multiphasic Personality Inventory - MMPI)
- U.S. National Criminal Background Check
- Drug Screening
- Lautenberg Amendment (Background Check to Carry Weapons)
- Physical Fitness Test
- Health Physical

# Methods of ..... COMPLIANCE

STS works with key law firms and related professionals that specialize in Maritime Law, governmental regulation and export controls. We conduct research to obtain the legal answers to questions regarding Customs Requirements, International Maritime Law, and Admiralty Laws and the rules and regulations pertaining to these issues. Our company not only provides protection from piracy and ransom, but also from extended delays from international legal issues by ensuring legal compliance with host nations.

STS Security also assures compliance with:

- International Ship and Port Facility Security Code (ISPS)
- International Convention for Safety of Life at Sea (SOLAS)
- International Traffic of Arms Regulations (ITAR)

# ARMORED Ballistic Protection .....

STS Security Products, LLC manufactures a Ballistic Barrier capable of mounting lethal and/or non-lethal countermeasures. These certified barriers stop the 7.62mm armor piercing ammunition currently used by pirates and have successfully defeated .50cal API ammunition. STS shields provide true ballistic protection and are simple to install and remove.

NIJ LEVEL IV & UL LEVEL 8

## DETAILS:

- NIJ Level IV
- UL Level 8
- Configured to mount:
  - Weapons
  - C-Through Shields
  - LRAD
  - Lasers
  - Fire Hoses
  - Other Devices
- 20° Deflection Angle
- Clean Face
- Non Obtrusive Design
- Cost Effective
- Presents No Threat Signature in Port
- Patented:
  - US 7,243,590 B2
  - US 7,051,637 B2
- ITC™ (Interlocking Tab Construction)
