

THE EVOLUTION OF PROTECTION

20° deflection angle and “clean face” design directs fragmentation down and away.

MASS is rated NIJ Level 4, UL Level 8, and has successfully completed V.50 testing with .50 caliber M2 Armor Piercing ammunition.

MASS will mount all medium and light machine guns in the U.S. inventory and can be modified to accept heavy machine guns as well.

Once you've seen the STS Modular Armored Security Shield (MASS), sandbags, water-filled emplacements, or other protective barriers will become a thing of the past. MASS is the most advanced protective barrier ever designed and provides true ballistic protection. The modular system can be configured to suit any mission and is easily adjustable to meet increasing threat conditions. The entire system is professional in appearance and completely portable for ease of movement, installation, and reconfiguration. Protection has evolved - MASS is the solution for security personnel and vital asset protection. To learn more, visit stssecurityproducts.com.
