

Piracy

Helping to ensure
→ doesn't pay

Maritime piracy has pushed up insurance costs, brought pirate gangs tens of millions of dollars in ransoms and endangered more lives in the last few years than ever before. At STS, we have developed one of the most comprehensive maritime security capabilities package that is available today. STS Security Products, LLC manufactures a Ballistic Barrier capable of mounting less lethal countermeasures such as the LRAD®, fire hoses, lasers, and many other devices. These Barriers are certified as NIJ Level IV and UL Level 8 and will stop Armor Piercing 7.62mm ammunition commonly used by the pirates. This provides true ballistic protection for personnel defending against pirate attacks. To learn more, visit www.stsmaritimesecurity.com

The patented, custom designed STS Ballistic Stand™ is capable of mounting the LRAD® and many other less lethal countermeasures against Piracy while protecting the operator. This is a cost-effective and easily installed method of providing true ballistic protection. By utilizing a 20° deflection angle and "clean face" design, our stand ensures maximum safety for ships crew and security personnel by safely directing bullet fragmentation down and away from the protected position. The design of this stand is non-obtrusive and presents no threat signature while in port, providing the opposite while at sea in hostile waters.
