Tactical Handgun

Our Tactical Handgun Courses are designed to develop the necessary skills to safely and effectively employ the handgun in a tactical environment. Students will undergo an intense training curriculum that will increase their speed, decision making skills, and confidence with a handgun. These objective based programs will apply the techniques and tactics that have proven to be successful in high threat environments.

Training Objectives:

- Handgun safety, characteristics, & accessories
- Fundamentals of marksmanship
- Disassembly / assembly & function check
- Maintenance / cleaning & lubrication
- Operation & handling
- Cycle of operation
- High & low ready positions
- Single & multiple target engagement
- Shot progression
- Recoil & sight management
- Administrative, tactical, & speed reloads
- Malfunctions & stoppages
- Immediate & remedial actions
- Draws from the holster
- Facing movements
- Adverse shooting positions
- Use of barricades (cover & concealment)
- Shooting on the move
- Engaging moving targets
- Training from “behind the power curve”
- Low light/night shoot
- Levels of awareness
